

# Resin Car Parks

The UK's premier resin car park installers

## Resin Car Park Installers

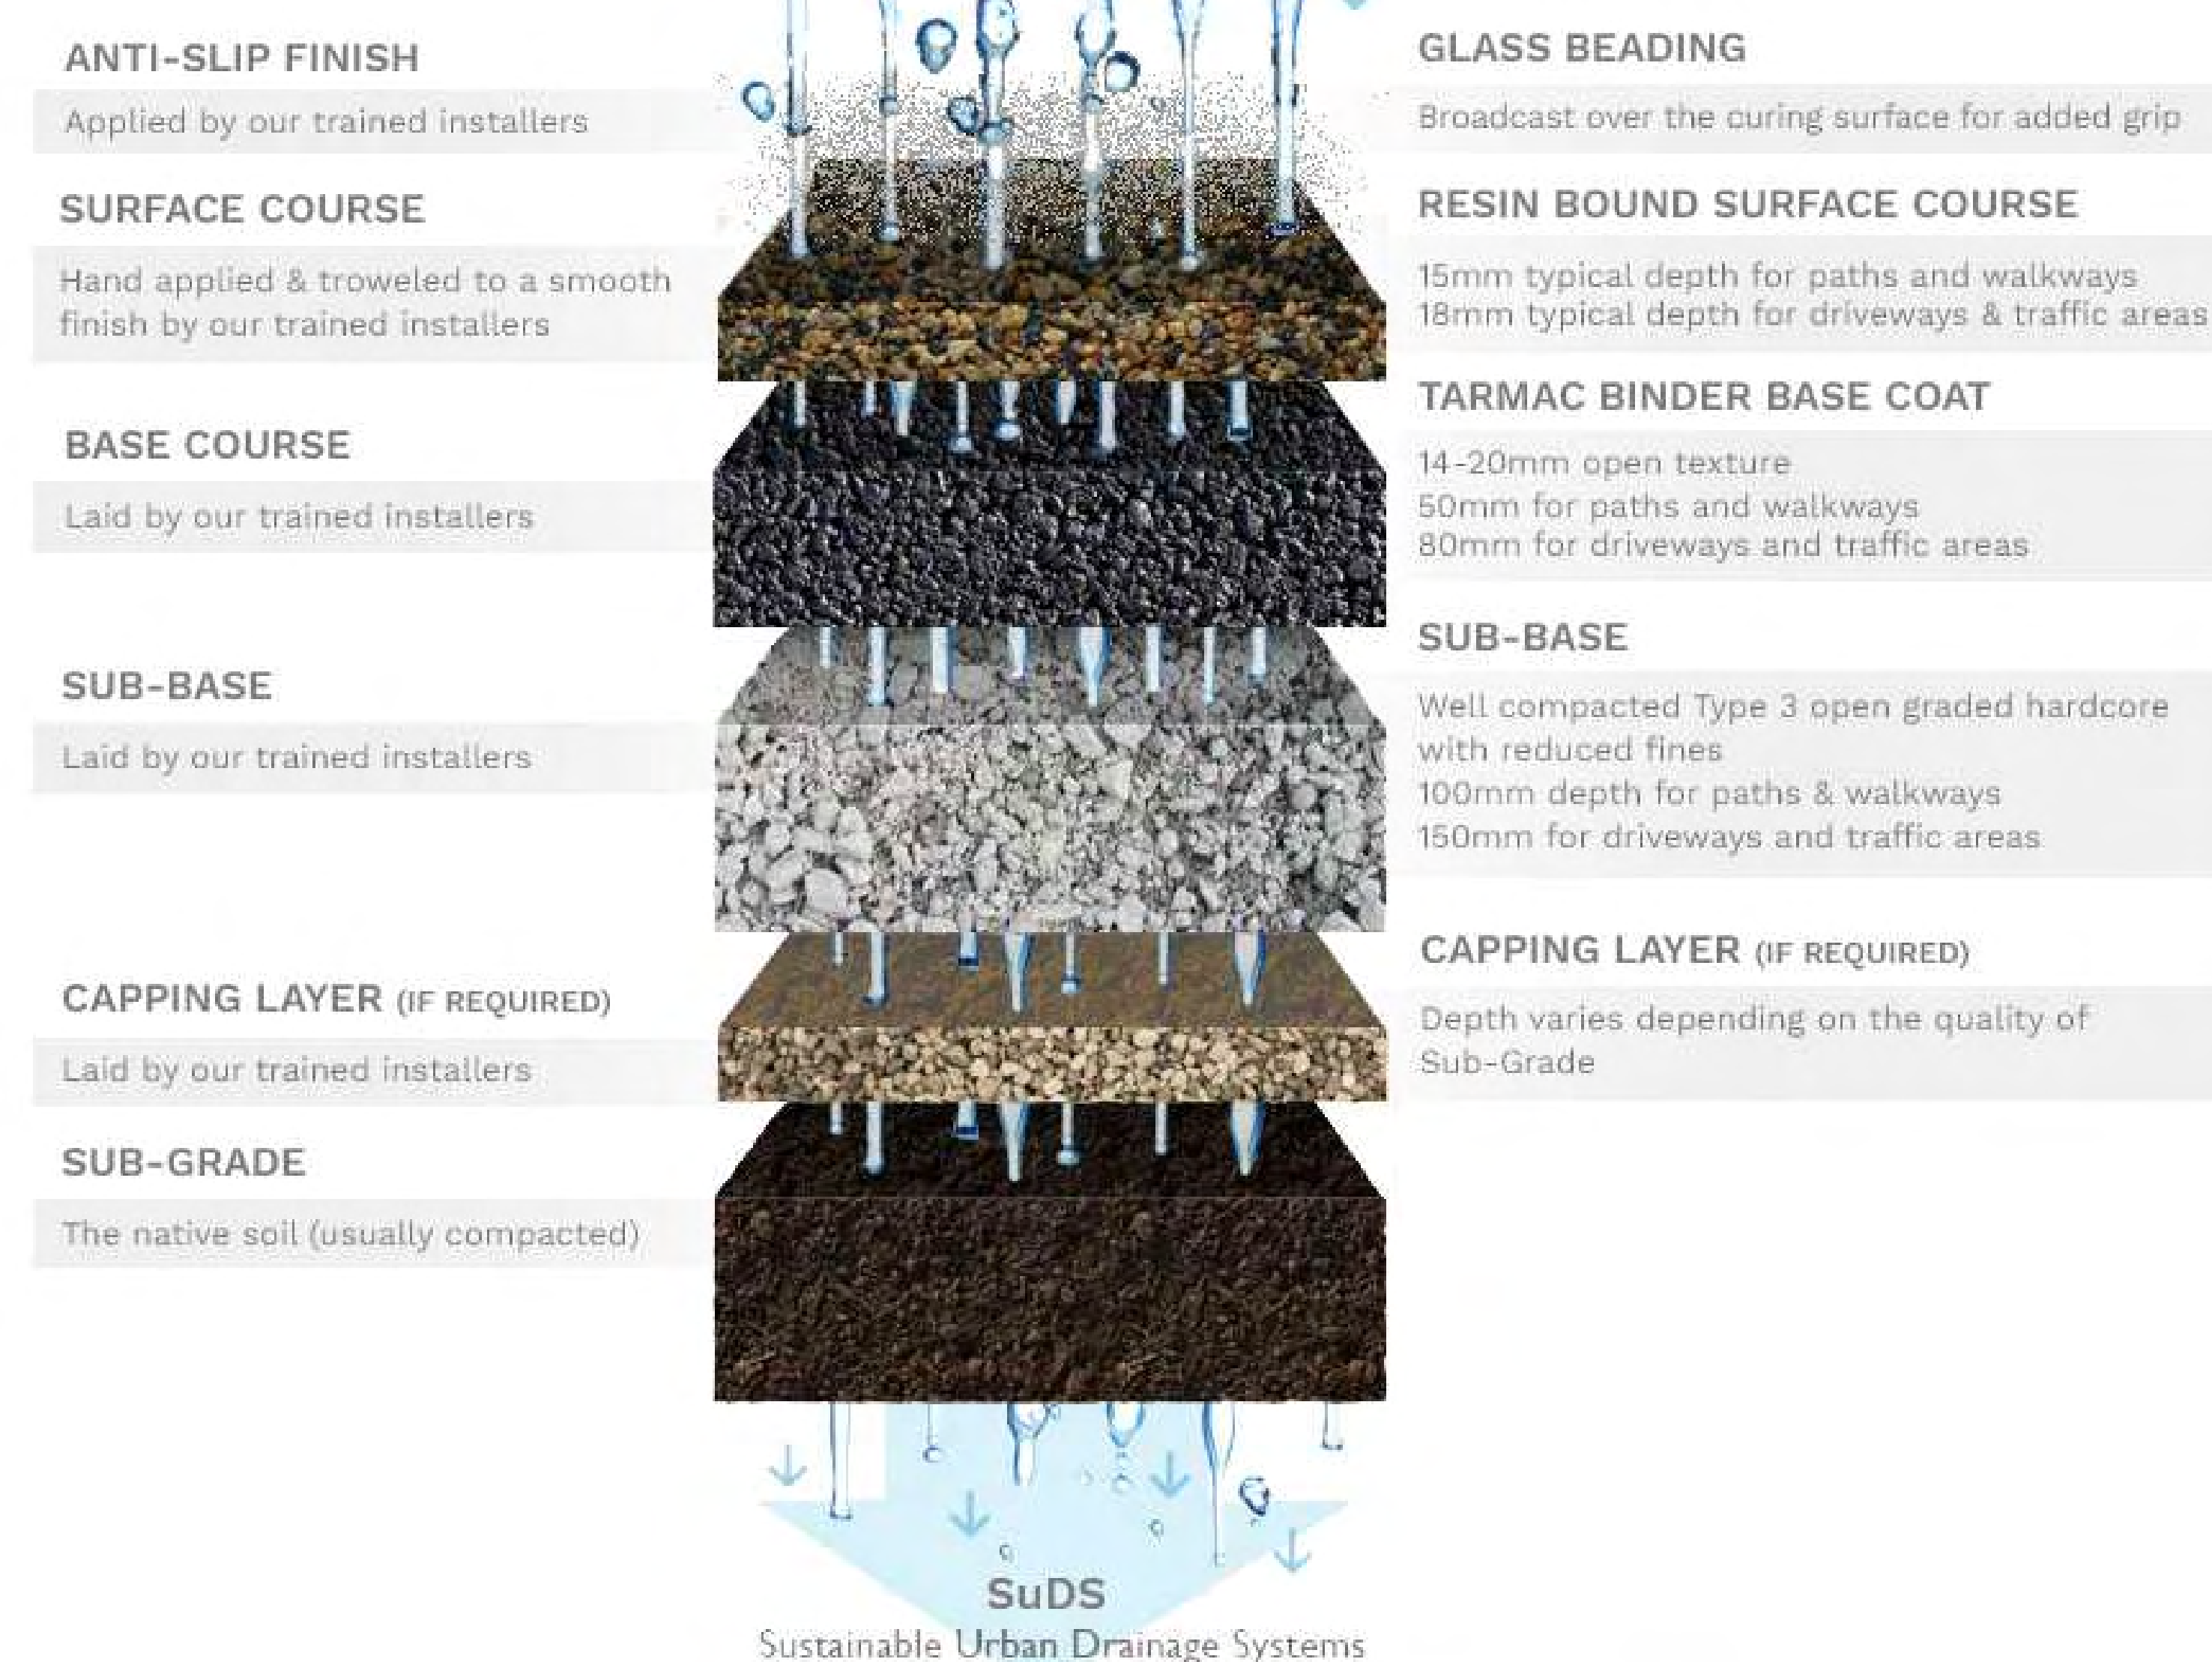

If you're looking for a car park that offers the immediate wow factor then a resin car park will offer kerb appeal in abundance.

No matter your specifications or requirements resin will fulfil them providing you with not only a visually stunning car park, but a hardwearing, practical car park that will last for many years to come.

We've been trading for almost 10 years and during that time we've installed resin car parks all across the country for domestic, commercial and other properties such as churches, hospitals and universities.

So why resin? It's visually stunning, porous meaning SUDs compliant and no planning permission is needed, it's hard wearing, eco-friendly and can be installed with a wide variety of finishes. The Yorkshire Resin Company offers a full 10 year guarantee on all work carried out by ourselves so offers peace of mind too. You don't pay anything upfront and only pay on completion.

### RESIN BOUND SPECIFICATION OVERVIEW

SuDS are drainage solutions that provide an alternative to the direct channelling of surface water through man made networks to nearby watercourses.

By mimicing natural drainage regimes, SuDS aim to reduce surface water flooding, improve water quality and enhance the amenity and biodiversity value of the environment. SuDS achieve this by lowering flow rates, increasing water storage capacity and reducing the transport of pollution to the water environment.

The need for alternative drainage such as SuDS is likely to increase to meet environmental challenges such as climate change and population growth. Provision for SuDS and the national standards required for their design, construction, maintenance and operation is included in the Flood and Water Management Act 2010.

# Resin Car Parks We've Installed

- **Universities** – Hardwearing and eco-friendly option
- **Church's** – Many designs and finishes available
- **Stadiums** – Offers an immediate wow factor for fans and corporate sponsors
- **Hospitals** – Extending existing outdoor areas for patients to enjoy
- **Head Offices** - What a great way to set the right expectations to potential customers and clients.
- **Tourist Attractions** - A flat stable hard wearing surface that is the perfect surface for those less stable on their feet such as small children, the elderly and disbaled.

## Bilton United Reform Church - Harrogate

We recently installed a brand new resin car park at Bilton United Reform Church in Harrogate which consisted of 595m2 of resin, with the car parks set out with decorative block edging clearly showing designated car park areas.

The resin finishes used here are popular choices by many of our customers being Burgundy and Sunburst. These we feel work well with the natural brick work of the church adding a more modern feel without taking any character away from the building.

## Our 5 Step Process

1. A full site survey of the area, this is when we listen to what you're looking to achieve and throw in some suggestions to provide you with a fully itemised quote.
2. A second visit to the car park where our team will take in depth photos and short videos to fully document the work in-hand to provide you with the perfect installation. You'll also choose the finer details such as the choice of finish and edging that may be needed.
3. Groundworks - Excavation of any area needing this process followed by the hardcore and tarmac layers along with any extra drainage that could possibly be required.
4. Our in-house power clean team will clean the full car park area ready for the resin installation itself.
5. The final stage - Your car park will be transformed with the resin being expertly finished across the car park area by our in-house professional experts.

## The Yorkshire Resin Company

The Yorkshire Resin Company is fast approaching trading for 10 years having groundwork experience for over 25 years, we're a professional, fully insured, friendly company with all our teams working in-house holding industry approved accreditations.
